OAuth Provider Settings

Configure the OAuth provider you're using to authorize REST API

OAuth Provider	Keycloak ▾	View Setup Guide
Keycloak Host:	https://localhost:8080	
Keycloak Realm:	master	

Introspection Endpoint: **https://localhost:8080/auth/realms/master/protocol/openid-connect/userinfo**

This endpoint of Keycloak will be called using access token to validate access token and get the username of the jira user calling the REST API.

Username/Email Attribute

This is the key in the json response returned by Introspection Endpoint *https://localhost:8080/auth/realms/master/protocol/openid-connect/userinfo* which contains the username or email of a user in jira. This will be used to determine who's calling REST API
